

Objective – 1 : Draw a mobile phone using GIMP.

Steps:-

1. First using Rectangle select create a rectangle to create the outer boundary of phone and the stroke the selected rectangle and repeat this for one more for the screen guard.
2. Clear the edges of the rectangle and using paths tool make curves at the four edges.
3. Write time and date at the screen of phone using text tool.
4. At the top of the rectangle using ellipse tool create two circles to make front camera.
5. Using rectangle select make a rectangle to make google search bar and using text tool write 'G' on the left end of this rectangle.
6. Using rectangle select create four icons at the bottom and using rectangle,ellipse,paths tool create their logos.
7. At the bottom create a filled ellipse,rectangle and triangle(using free select tool).
8. At the top left use text tool to write network operator and at top right for network signal use a pencil and for battery a rectangle.
9. Add any image to the inner screen and choose a specific pattern to give a wallpaper effect on the screen.
