PROJECT

The goal of this project is to showcase the scene of village where people have their own vegetation, where they grow crops and have fruit gardens. They also are updated with technology, by using modern machinery like tractors for farming. There is a paved road.
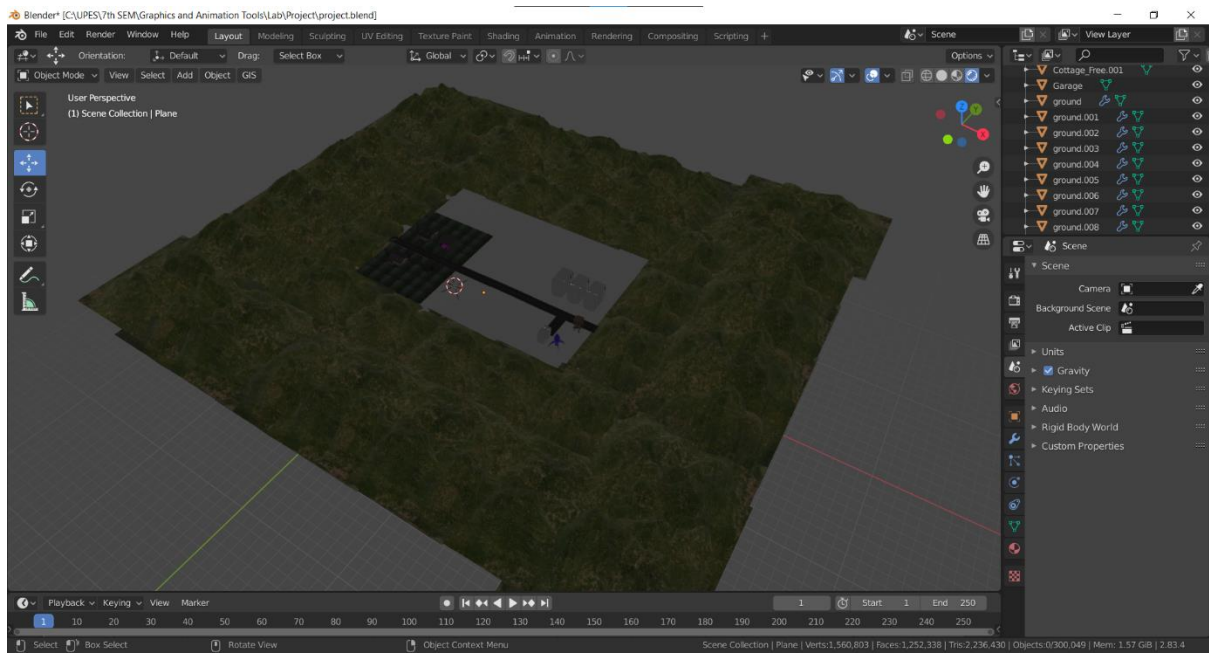

There is a urban neighbourhood nearby where people live in apartment s. This is a more developed neighbourhood, where people live in bigger houses and have their own Vehicles. There are more wide roads in this urban locality.

Within every developing country their is a space program. Most space space stations are located at remote places where there is no urban places nearby. So there is a space craft launch station here.

Final landscape consists of Mountains surrounded from all the corners of the plane.
